# Ready,Set,Go! is publishing made simple.

It's simple because Ready,Set,Go! gives you all the tools you need to create printed pages - grids, guides, drawing tools, color support, tints, arrows, graphic file import filters and the most powerful typographic word processor on the market today.

It's simple because Ready,Set,Go! puts you in control. You see exactly how the finished page will look on the screen, before you invest in imagesetting or even settle on a final page design. Changing the position of text and graphics is as easy as clicking and dragging. So you can afford to experiment.
Ready,Set,Go! is simple because, with just a few keystrokes or a menu choice, it performs advanced graphic operations such as scaling graphics or making text runaround a picture. And of course, it's just plain easy to use. Once you learn a few basic skills, you can create pages that normally require the skills of many different people - word processors, typesetters, and pasteup and layout artists.

DIWAN Diwan Software Ltd.   www.diwan.com

Ready,Set,Go!
Simple yet powerful.

- Wide range of palettes lets you modify your document instantly.

- Full range of text and graphics filters included.

- Design pages quickly with grids and guides.
